net weight **14g**

easy carry key chain & belt clip

CAUTION STRONG IRRITANT
 CONTENTS UNDER PRESSURE
 Read additional cautions on back - Not for sale to minors

CAUTION:

Defense sprays may take several seconds to work and may not be effective in every circumstance. Please read the following important information:

- You should test the functioning of your unit periodically by discharging one or two short bursts outdoors in a safe area away from all persons and animals in the vicinity. Take care that you do not exhaust the contents of the unit you intend to rely upon.
- Your best protection is to avoid potentially dangerous situations if you can.
- Always be aware of your surroundings.

HOW TO USE

- When you sense that you are in a potentially dangerous situation, have your unit in hand and ready to use. The finger grip design allows you to feel how the unit should be held. The flip top safety cap will prevent access to the actuator button if you're carrying on baggage.
- Slip your thumb under the flip-top safety cap and be ready to spray by pressing down on the actuator button with your thumb.
- Point and spray short bursts at the nose, mouth and eyes of the aggressive dog, allowing you an opportunity to move away from the area and out of harm's way.
- The unit is designed to be actuated in short bursts aimed at the dog's face. When actuated, the irritant agent will issue from the unit a distance approximately 8 to 12 feet. Avoid spraying directly into the wind. Use the unit in the upright position only, otherwise it may not function properly then or afterwards.

- The formula is an organic pepper-based compound which causes extreme irritation on contact with a dog's nose, eyes or mouth. The effects begin within a few seconds causing a dog to cover and retreat. It is normal for most dogs to roll on the ground and rub their eyes in an attempt to remove the spray from the facial area. The pain, irritating effects usually disappear within minutes, leaving the dog unharmed.

CAUTION: Failure to follow these instructions may result in first or second degree burns, severe skin irritation, depigmentation or other skin injury.

FIRST AID

Remove contact lenses and contaminated clothing should be cleaned prior to use. Do not apply saliva, eye drops, or other liquids to the area. Flush contaminated area with large quantities of cool water or a diluted baking soda solution and expose the area to fresh air as soon as possible.

- Do not apply salves, creams, oils or lotions as they can trap the irritant agent against the skin and result in blisters or burns.
- Consult a physician if irritation persists.

LEGAL REQUIREMENTS

You should test the functioning of your unit periodically by discharging one or two short bursts outdoors in a safe area away from all persons and animals in the vicinity. Take care that you do not exhaust the contents of the unit you intend to rely upon.
