Stun Gun Model 80350 (Black)

Congratulations on your purchase of the Mace® Brand Stun Gun. This device provides the convenience of a high-output LED flashlight and the stopping power of 2,500,000 volts of electric shock. Prior to carrying or using this device, you must read and understand this entire manual. Warning: Keep this device out of the reach of children and irresponsible adults.

! WARNING!

Electronic Control Device

- Can temporarily incapacitate assailant.
- Can cause serious injury.
- Keep away from flammable materials.
- Keep out of reach of children.
- Comply with all warnings and instructions in this manual.
- Comply with all laws regarding possession and use.

Your best protection is to avoid potentially dangerous situations if you can. Always be aware of your environment and the people around you. Be especially alert after dark. Do everything you can to escape from an assailant before resorting to the use of your Mace® Brand Stun Gun.

! WARNING: This device is not water-resistant. Keep away from water, rain, etc. If any liquid or foreign object has entered the device, do not use the device.

- Do not touch the internal parts. These are circuits that may cause severe electric shock.
- Do not open, disassemble or modify this device, as it may cause damage to the device.
- Keep away from flammable materials.
- Never store near hot objects, in direct sunlight or at a temperature above 120°F.
- Keep out of reach of children.
- Use only in a lawful manner. Check federal, state and local laws for stun gun possession and use restrictions.
- Do not discharge the unit into the air for more than 1 second at a time. Continuous firing for a longer duration can damage unit and will void the warranty.
- Do not shock metal or other conductive materials.
- This device may only be used only in accordance with this manual and for lawful self-defense or defense of others to temporarily incapacitate a person, however, be aware that such use of force for purposes of legal self-defense or other personal defense, as with any use of force for defense purposes, carries with it the likelihood that someone will get seriously hurt, or even killed, due to physical exertion, unforeseen occurrences and individual vulnerabilities. You accept and understand these risks when using this device.
- Some effects of the use of the stun gun on the assailant are: loss of balance and muscle control; confusion and disorientation; falling to the ground without the ability to catch him/herself; involuntary muscle contractions to varying degrees; and possible drowning if assailant is near water, as his/her ability to move will be restricted.

CHARGING
Prior to the initial use, this device must be charged for 5 hours. Plug the digital connector into the stun gun and the opposite battery is charging. The power cord is relatively short so the stun gun should be supported on a shelf while charging. Do not allow the stun gun to hang from the cord as this may damage the power cord or the stun gun. After any use or long periods of inactivity, it is recommended that the stun gun be recharged for 2 hours.

HOW TO USE
When you sense that you are in a potentially dangerous situation, have your stun gun in hand and ready to use. The powerful LED feature of the stun gun may be activated by sliding the arming switch from the Off position to the midpoint which engages the LED. Use the LED feature to momentarily distract the assailant. To arm the stun gun, slide the arming switch completely forward. The LED in front of the arming switch will glow bright red and the device is ready to stun the assailant. [FIG. 1]

Many times, the visual and auditory effects of operating the stun gun by themselves are an effective deterrent. The depressive electrical arc and the loud snapping sound will often make the would-be assailant think twice about attacking. Depressing the red stun button with the index finger as a warning might be all you need to keep the would-be assailant from approaching. If the situation escalates to where you feel it necessary to deploy the electrical charge of the stun gun on an assailant, hold the electrodes against the body of the assailant and depress the red stun button with the index finger. The most effective stun locations are the shoulder, hip, thigh, buttocks and below the rib cage. While holding the stun gun against the body, you will not see or hear the spark. You may continue to fire the stun gun for as long as necessary without damage to the device. Once the assailant is subdued, depart from the scene and immediately summon law enforcement for help. Do not punish the assailant by continuing to deploy the stun gun. Do not attempt to take the assailant into custody—you may be injured if you do. When you are in a safe location, slide the arming switch back to the Off position.

! WARNING: Avoid contact with the electrodes located at the front of the device, while the unit is armed and while testing the device.

EFFECTS OF THE STUN GUN (Also refer to warnings above and on previous page)
A shock from a stun gun of one second or less will cause pain and minor muscle contractions. Stunming the assailant for one to two seconds will cause spasms and a dazed mental state. Stunming an assailant for three to five seconds will cause loss of balance and muscle control. Do not continue to stun an assailant once you are able to escape to safety.

TESTING
To the On position, and press and release the red stun button for one second or less. A bright arc will jump across the two electrodes and a loud snapping noise will sound. Once you have completed the testing operation, slide the arming switch back to the Off position. Do not test the device for an extended period of time as this may damage the device and will drain the battery.

LEGAL REQUIREMENTS
Possession and/or use of a stun gun may be regulated or prohibited in some jurisdictions. It is your responsibility to investigate and know the law regarding possession and use of stun guns in your jurisdiction. Under current FAA regulations, this device is permitted in checked baggage only. Do not carry this device on your person or stow in your carry-on baggage. For additional information, please visit www.fsa.gov.

Always keep stun guns out of the reach of children. Keep away from flammable materials, as an explosion may occur. Must be 18 years of age or older to purchase. ID check required. Check state and local laws regarding product usage. This device is intended for legal defensive purposes only and may not be possessed or used by a person under the age of 18.

SAFETY AND STORAGE
In light of the potential for serious injury, it is important to keep this device out of the reach of children and irresponsible adults. Do not store this device in an environment where the temperature may exceed 120°F. Do not store this device in a damp environment.

LIMITED WARRANTY
MACE PERSONAL DEFENSE & SECURITY, INC. ("MACE® BRAND") WARRANTS THIS PRODUCT TO BE FREE FROM DEFECTS IN WORKMANSHIP AND MATERIALS UNDER NORMAL AND PROPER USE AS DESCRIBED IN THIS MANUAL FOR A PERIOD OF 180 DAYS FROM THE DATE OF PURCHASE.
